

BM00CS

Control Module BM00MC is the core component of battery monitoring system for battery data collecting & uploading and accurate assessment of alarm. Allow to setup at site, Live data viewing and restore.

Feature

- Remote Monitoring
- Measure Frequency:10 sec
- Wall or Rack Mounted
- Patent Daisy Chain Connection
- Ethernet Communication
- RS485/RS232 Communication
- Volts free contact for output alarm
- Visual Live data viewing and storage
- Data Storage
- External Power Supply

Monitoring Parameter

- Overall Voltage
- Block Voltage
- Block Temperature
- Block Internal Resistance
- Charge & Discharge Current

Application

- Data Center
- Telecom Base Station
- Power Generator
- Railway & Trackside Equipment
- Hospital
- Banks
- Securities
- Insurance
- Air traffic control
- Critical Production Process Plant

Electrical Specification

Item	Description
Operating Voltage	DC 24V±10%
Power Rating	5 Watt
Operating Current	1 Ah

Communication Features

Item	Description
Port	RJ10、RJ45、RS485、RS232
Baud Rate	9600bps
Max. Connection of RJ10	Max 254 unit of Battery Sensor
Max. Connection of RJ10	Max 6 bank
Transfer rate of RJ45	Max 10Mb/s

General Specification

Item	Description
Operating Temperature	-10 ~ 65°C
Storage Temperature	-40 ~ 80°C
Weight	800 g
LCD Screen	4.3 inch

BM00CS Interface

- ① DC24V Power Supply Input
- ② ON/OFF
- ③ Internet Port
- ④ Daisy Chain R-BUS Connection
- ⑤ RS232, ISP loading and setup parameter
- ⑥ Toggle Switch.

ISP: Internally Stored Program Uploading.

RUN: System Running.

CFG: System Configuration

RS485 & Volts Free Contact

BM00CS Indicator

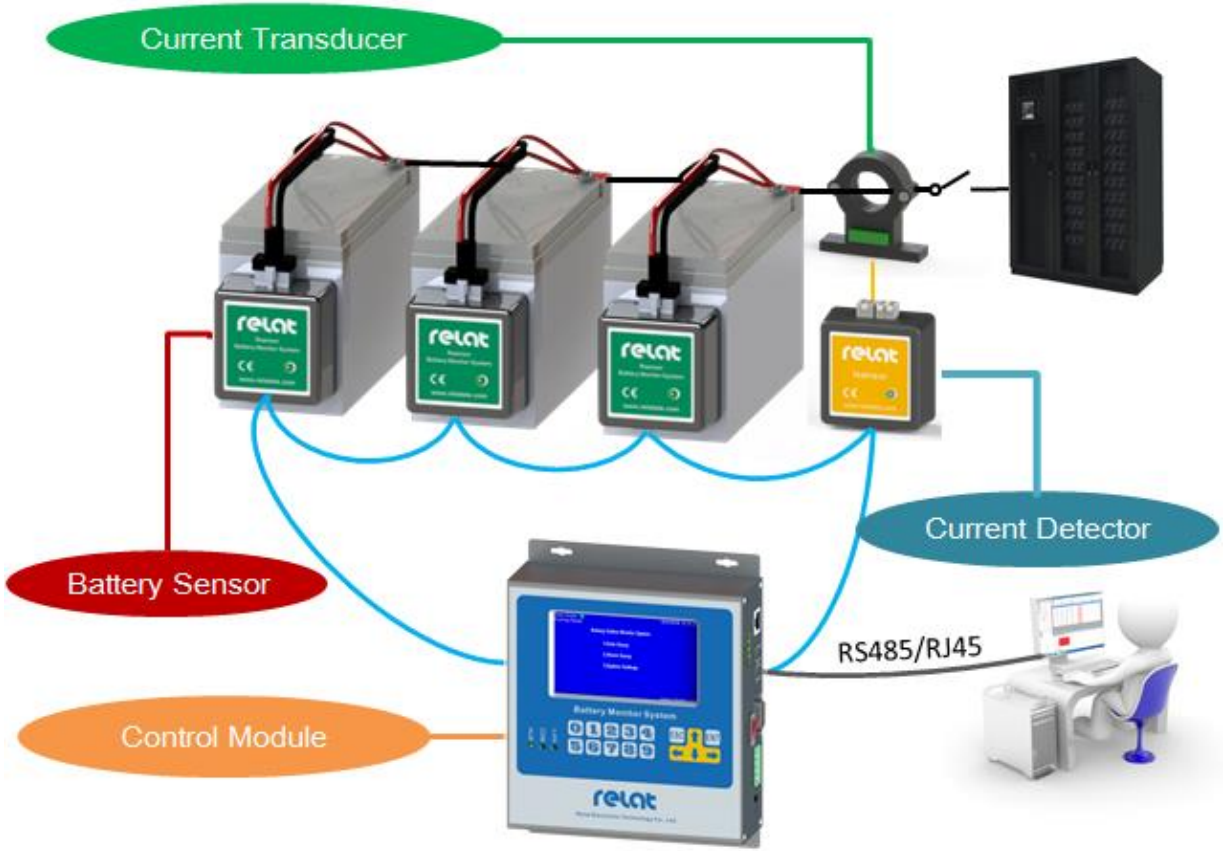

ALARM Red : Led Indicator for alarm

RUN Green : Green Indicator for running

COM : Communication Indicator

LAN : Blinking Indicator for running
